

ROOF WALKWAY

When Safety Matters

FRP Roof Walkway grating has been designed to meet the requirements of Australian Standards AS1657-2013 and various codes of practice for safe work on roofs.

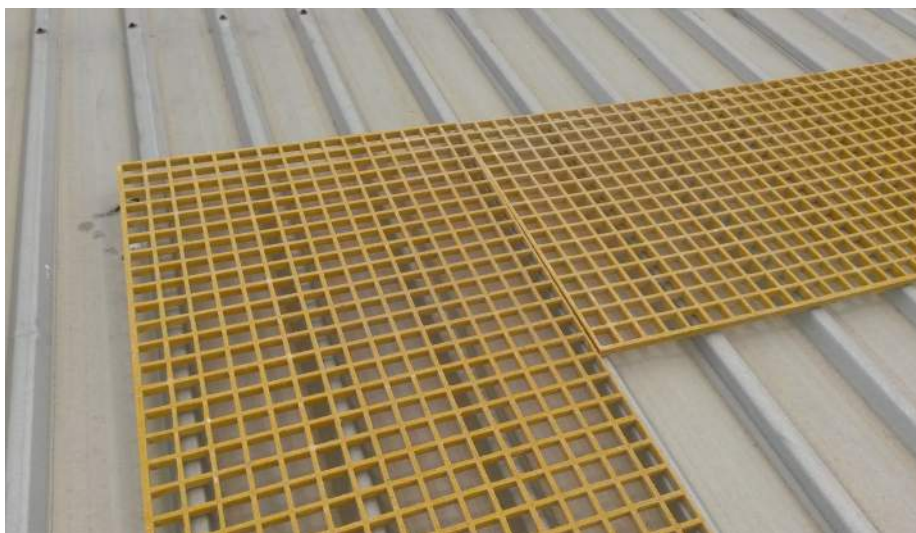

Manufactured using premium grade resins, **FRP** roof walkway is designed to provide a long service life even in the most arduous of environments. Utilising square mesh configuration with non-slip surface the **FRP** roof walkway provides a safe multi-directional walking surface.

The extremely strong yet lightweight construction allows for easy installation with no additional walkway supports required. Weighing in at just over 2.6kg per metre, the **FRP** roof walkway will not affect the structural integrity of the roof.

The raised surface achieved with the **FRP** roof walkway grating provides an unimpeded flow under the walkway for water to escape.

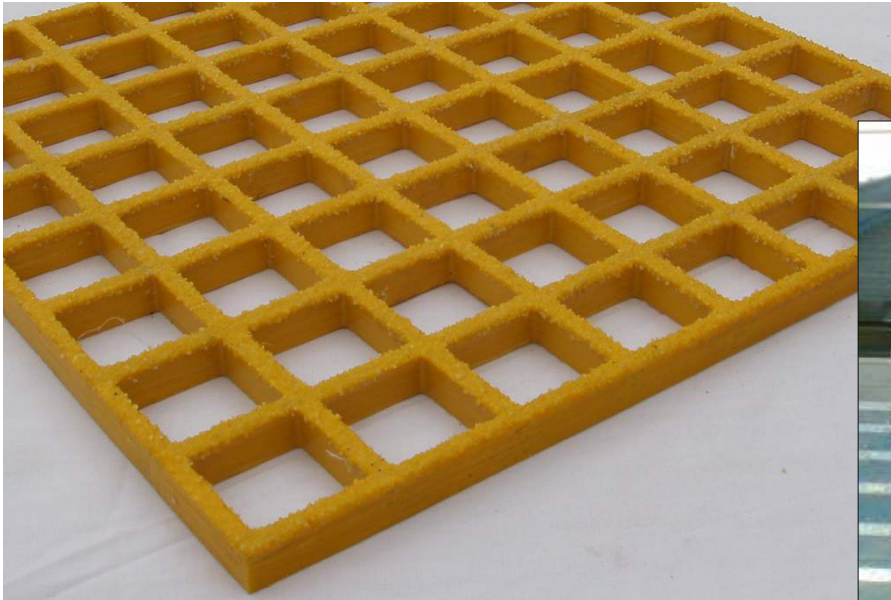

Walking on a smooth, slippery surface can be difficult at the best of times but add in a slope to that surface and the degree of difficulty increases. This is what personnel who are required to inspect and maintain roof top infrastructure are confronted with each day.

FRP roof walkway grating makes accessing roof infrastructure far less treacherous.

Roof Walkway Grating

- Corrosion Resistant
- Lightweight
- Easy Installation
- Non-Slip Surface
- UV Stabilised
- Cost Effective

- 1 standard 615mm wide panel
- 2 standard lengths available, 3660 & 2900mm
- 3 standard colours, Safety Yellow, Light Grey & Black
- Available with or without gritted Surface

PRODUCT CODES

RW	615	2900	Y	N
Product Code	Width	Length	Colour	Finish
		2900mm	Y = Yellow	G = Gritted
		3660mm	G = Light Grey	N = Non-gritted
			B = Black	

Complimentary Products

- FRP Louvres
- FRP Telecoms Screening
- FRP Equipment Stands
- FRP Ladders
- FRP Handrails
- FRP Cable Ladder
