

SAFETY ACCESS PRODUCTS

When Safety Matters

Since 2003, FRP Engineering has been supplying a comprehensive range of quality non-slip floor products that are the ideal solution to the problem of fixing slippery walkways including slippery floors, ramps, stairs, steps and landings for a wide variety of applications.

Safety issues need to be dealt with quickly and permanently. Safety Access Products provide the tools to reduce the chances of slips and falls that cause workplace injuries. All products are 100% FRP (Fibre Reinforced Polymer) so they won't rust, rot or corrode in even the harshest environments.

Achieving a classification for "slip resistance" of **R13** (Medium*) to AS4586:2004 with an acceptable surface angle of up to 36.4°, the non-slip products provide peace of mind to all personnel on any surface

Available in both Industrial (medium and heavy duty) and Commercial grade slip resistant grit, all access options are covered.

Sobering Statistics

Slips and trips (falls on the same level)

The following data is based on ANZSIC 1993, TOOCS 2.1 and ASCO:

The second most common reason for injury after muscular stress , accounting for 13.1%

On average 2,321 LTI/Ds result from the mechanism of injury Falls on the same level each year. The total number of day lost has increased from 134,040 in 2004-05 to 190,093 in 2008-09 – a 41.8% increase.

Sprains and strains is responsible for more than half (57.6%) of all injuries resulting from slips and trips during 2004-05 to 2008-09.

Data provided by the Department of Commerce WA

Stair Nosings, Tread Covers and Plate

- Barefoot to Heavy Duty surfaces
- Corrosion Resistant
- Suits all substrates
- Quick to install
- Low Installation Cost
